Diamond 9 Impacts of flooding

Localized floods are recorded across the Midlands, centred on Evesham in Worcestershire.	The River Avon rises to more than five metres above its normal level.
The M5 is closed and 10 000 people spend the night stranded on the motorway.	The cost of the flooding was unknown at the time, but it is estimated that insurance claims will run to £1.5 billion.
Holiday parks are evacuated by Air Sea Rescue helicopters.	The rain eases but the problem moves downstream to Abingdon and Oxford as the floodwater begins to flow down the River Thames.
Bridges are closed as debris builds up and they threaten to collapse.	Gloucester electricity station is within centimetres of being swamped. Emergency pumps and sandbags keep it open and power to 25 000 homes is maintained.
900 water bowsers (tankers) are sent to Gloucestershire.	Roads collapse as streams that run underneath them become swollen with water.
Tewkesbury is worst affected as the Rivers Severn and Avon meet, creating a huge lake. Tewkesbury is completely cut off.	Tewkesbury's water pumping station is flooded and the water supply is contaminated. 350 000 homes are without water for more than a week.

geography@work Why are some countries dry whilst others flood?

How does a diamond 9 work. Diamond 9 examples. Diamond 9 explained.

We prefer them because they stay the same when printed, sometimes Word or similar programs mess with the scale and size which then sometimes makes the document unusable or at least look a bit dodgy. These were intended to be printed as they are and not edited. We would recommend you display the options for the diamond 9 on the screen, or print if necessary - that way these become a great resource to have in your toolbox so to speak. You can actually convert them to Word if you need to edit them, your ICT department will probably know how. A set of activities based around the sinking of the Titanic in 1912. Children establish the main sequence of events, then investigate the causes of the tragedy. They complete a 'Diamond 9' worksheet to rank causes in order of significance. They then carry out a balloon debate in groups of five, each child representing a key person or group of people who were involved in the disaster. This resource includes teaching notes (please note the teaching notes contain links to external sites). It is suitable for Y5 and Y6. There are no reviews yet. Have you used this resource? Review this resource Last updated 20 August 2014 This resource offers a simple diamond ranking template on Page 1 and on page 2 (2 sets of 9) images that I used to assess what pupils perceptions of what was important in Maths. It worked really well to get some discussions going in class. Students basically put the images onto the template in order of what they think should be the most important to the least important.
