He'll forget it. That's the confusion! There's an abundance of clues, and half a dozen suspects, most of which hide facts about themselves. Hercule Poirot is ably assisted by the black luster Hastings, and we are introduced in this first novel to Agatha Christie's PC Plod, who is the Inspector James Japp. Poirot? He didn't have more than a meter and a half, four inches, but he wore it with great dignity. He won't agree. Even so, were Dr. John Watson's first impressions of Sherlock Holmes, as a rather eccentric guy, given to imaginative and fantastic ideas, which repeatedly puzzled Watson, as they often proved right. It was 1904 when he and I worked together -- the Abercrombie forgery case -- remember, it was in Brussels. Ah those were great days, Moosier was considered one of the best detectives of his day. Captain Hastings faithfully establishes the order of events at Styles Court, and we follow along with him, through history, as he tells the events one by one. Captain Hastings has always had a secret desire to be a detective! Cynthia Murdoch works at a pharmacy, still doing war work. Dr. Bauerstein is a well-known toxicologist, who is actually not at home, but lives quite close to Styles Court. There is also an acute, no nonsense type of woman, Evelyn Howard, Emily's companion, who is the most explicit of the residents about her disgust for Alfred Inglethorp: Look at that devil -- her husband. Here we also see an exuberant side to him: I'm like a refreshed giant. We must also meet another reincarnation; this time of a police officer, already known to Poirot. Just for one I had a premonition to get closer to evil. Agatha Christie had started working on 'The Mysterious Affair at Styles' in 1916, writing most while staying in a hotel on Dartmoor. In the mysterious affair at styles, Captain Hastings is on sick leave from the Western Front, and currently a guest in a home in Essex, belonging to a wealthy old lady, Emily Inglethorp. Captain Hastings is a kind of rather formal, meditative, old-fashioned type, and although he diligently records everything in logical order, he ensures that his readers know that he only selects what he himself considers to be relevant. I'll run! I'll jump! And in very truth, running and jumping, he did. Gambolling wildly along the stretch of lawn outside the long window. "Sometimes, I feel sure he's crazy as a hatter; And then, just as he is in his madness, I find there is a method in his madness. "But where did it come from? I determined to read the first novel in which he appeared, to see for myself. We know her sharp, her quick smile and "sparkling eyes." We know of his "read" head and his insistence in terms of cleanliness and order in all things, to allow the "electic grey cells" of his brain to work. We have to be so smart that he doesn't suspect us of being smart at all. "You see, my friend, you have such an honest nature, and a face so transparent, that -- Enfin, to hide your feelings is impossible! You gave too much analyzed to your imagination. One of Agatha Christie's most famous creations, who has acted in a wealth of novels and stories, just arrives, fully formed? Later, it was to become one of the first ten books published by Penguin books" when the publishing house was founded in 1935. The literary supplement Time Times "said in 1921: The only flaw this history is that it is almost too much "However, it is extraordinary to think that the mysterious styling deal was Agatha Christie's first mystery novel. This time his great revelation is in the library of styles, and we know that the last to announce, will be what he did. "SA, A" intelligent. The cleanliness of her clothing was almost unbelievable. Poirot now settled in the village, near the home of Emily Inglethorp, who helped him leave again, after having been a Belgian refugee of the First World War. The simplest explanation? "Always the most probable". "I can almost promise. That you won't guess the ending to this. Both men are delighted and surprised. Quite sure, Hastings bumps into Hercule Poirot himself in the village. He said the character of the Hercule Poirot was inspired by her experience working as a nurse, ministering to Belgian soldiers during World War I, and also by Belgian refugees living in her town Torquay, just's birthplace as with Victorian novels, The Mysterious Affair with Styles was first published in serial form. "All the doors were bolted inside." Helping our attempts to detect, the novel includes maps of the house, the murder scene and a drawing of a fragment of a will. ! Danger to the detective who says: "It doesn't matter. As a detective, his talent had been extraordinary, and he had reached Triumphs by unveiling some of the most baffled cases of the day. ... More! Lawrence Cavendish known for studying medicine. Poirot loves his theater endings, where he assembles all the suspects together: "Demonstration as if it was a celebrity to deliver a lecture ... before gradually explaining why each of them, one by one, could commit the murder. His head was exactly the shape of an egg, and he always perched it a little on one side. It would develop these methods and rationalize it in a modern way of detecting. Yet this picturesque little man dandified who, I was sorry now zoppic? badly, he had in his time been one of the most celebrated members of the Belgian police.
